

Notice to Shareholders

Beginning January 1, 2021, as permitted by regulations adopted by the Securities and Exchange Commission, the Fund's shareholder reports will no longer be sent by mail unless you specifically request paper copies of the reports. Instead, these reports will be made available online.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you do not need to take any action. If you receive shareholder reports by mail, you will be sent a single-page document that includes the web address to access the full report with instructions to request a printed copy at no charge. You may elect to receive shareholder reports and other communications electronically from the Fund anytime by contacting your financial advisor or institution.

You may elect to receive all future shareholder reports in paper free of charge. If you'd like to continue to receive a paper copy of the full report, visit www.fundreports.com any time prior to January 1, 2021. Your election will apply to all funds held in your account.

SAVOS DYNAMIC HEDGING FUND

ANNUAL REPORT | SEPTEMBER 30, 2020

Savos Investments Trust

NOT FDIC INSURED | NOT BANK GUARANTEED | MAY LOSE VALUE

LETTER FROM THE PRESIDENT

Savos Dynamic Hedging Fund Report for the One-Year Period Ended September 30, 2020

Enclosed is the annual report for the Savos Dynamic Hedging Fund (the “Fund”) for the one-year period ended September 30, 2020. This letter reviews the market conditions and factors affecting the Fund’s performance during the year and discusses the implementation of the Fund’s investment objective and strategies.

The Fund’s Objective and Strategy

The Fund seeks to partially offset extreme declines in the equity markets while also seeking to provide positive total returns in rising markets.

During normal market conditions, the Fund invests primarily in equity securities that broadly represent the US equity market, derivative instruments related to the US equity market and fixed income securities. Savos Investments (a division of AssetMark, Inc.) (“Savos”) uses one or more quantitative, rules-based methodologies to determine when to alter the Fund’s exposure to the US equity markets. When Savos’ quantitative models indicate the increased likelihood of a significant downturn in US equity markets, the Fund will reduce its exposure to US equity markets and/or invest in instruments that provide short exposure to the US equity markets. The Fund will obtain its short exposure to the US equity markets through the use of derivative instruments such as futures contracts, options and/or swaps or through the purchase of ETFs that it believes may effectively hedge equity investments.

The Fund is intended for use by asset managers to provide some measure of downside protection in the event that client assets, which are sensitive to movements in the equity markets, are exposed to significant loss of value as a result of a severe and sustained decline in the broad-based equity market. The Fund is not designed to react to short-term price movements, and significant short-term price movements could adversely impact the performance of the Fund. Changes in the Fund’s equity market exposure are expected to lag changes in the market, and there is no guarantee that Savos’ models will operate as intended and/or accurately indicate future market movements. Additionally, while the Fund’s decreased exposure to equity investments may reduce the Fund’s potential for loss, it also will reduce its potential for gain. For these reasons, the Fund is intended to be used by long-term investors. The Fund is not a complete investment program and is intended to be used as a component of a broader investment allocation.

Market Overview

The broad US equities market delivered positive performance over the one-year period ended September 30, 2020, with the S&P 500® Index (the “S&P 500”) returning 15.15%. Despite continued concerns about the economic impact of the novel coronavirus pandemic, the S&P 500 closed at a record high during the third quarter of 2020, returning 8.93% for the quarter.

US small cap stocks, as measured by the Russell 2000® Index, underperformed both the broad US equities market and US large cap stocks over the same one-year period, returning 0.39%. US small cap stocks also underperformed both the broad US equities market and US large cap stocks in the third quarter of 2020, returning 4.93%.

US large cap stocks, as measured by the Dow Jones Industrial Average®, outperformed US small cap stocks but underperformed the broad equities market over the same one-year period, returning 5.70%. US large cap stocks also outperformed US small cap stocks and mildly underperformed the broad equities market in the third quarter of 2020, returning 8.22%.

The Fund's Performance

For the one-year period ended September 30, 2020, the Fund returned -6.80%, underperforming the S&P 500. The Fund delivered lower volatility (i.e., smaller market swings) than the S&P 500 over that period.

Over the reporting period, the daily average of the Fund's exposure to S&P 500 futures contracts was 85.2% of net assets. The Fund's equity exposure contributed negatively to the Fund's absolute return for the year due to the variation of the Fund's equity exposure during periods of positive and negative return for the equity market.

As part of the Fund's dynamic hedging strategy, during the portion of the reporting period extending from October 1, 2019 through January 31, 2020, the Fund averaged 10% exposure to a dynamic volatility strategy implemented through a swap contract. That investment added to Fund performance on an absolute basis during the reporting period. In addition, during the portion of the reporting period extending from October 1, 2019 through February 29, 2020, the Fund averaged 4.8% exposure to an option-based income strategy implemented through a swap contract. That investment detracted from Fund's absolute return for the reporting period.

Thank you for your investment in the Savos Dynamic Hedging Fund. We appreciate the opportunity to continue serving your investment needs.

Sincerely,

Carrie E. Hansen
Trustee, Chairperson and President, Savos Dynamic Hedging Fund

Important Information

The AssetMark platform provides fee-based investment advisory programs. Investors are advised to refer to the appropriate Disclosure Brochure, which can be obtained from your financial advisor, for a full description of services provided, including all applicable fees.

Savos Investments is a division of AssetMark, Inc. AssetMark, Inc. is an investment advisor registered with the Securities and Exchange Commission. The PRINCIPAL UNDERWRITER for SAVOS DYNAMIC HEDGING FUND is AssetMark Brokerage™, LLC, a member of the Financial Industry Regulatory Authority. Past performance is no guarantee of future results. For the S&P 500® Index, Dow Jones Industrial Average® and Russell 2000® Index, the closing values of their total return index results for the end of each quarter are used as the basis of performance calculation.

All index returns are sourced from Morningstar. It is not possible to invest directly in an index.

Investment Terms

Volatility is a statistical measure of the dispersion of returns for a given security or market index.

Market Capitalization or Market Cap refers to the total value of an issuer's shares of stock. It is calculated by multiplying the price of a stock by its total number of outstanding shares.

Absolute Return refers to the gain or loss experienced by the Fund over a given period, independent of the Fund's benchmark or any other standard. Relative return, in contrast, refers to the Fund's performance relative to a benchmark.

Index Definitions

Dow Jones Industrial Average® is an unmanaged index composed of 30 common stocks.

Russell 2000® Index measures the performance of the 2000 smallest companies in the Russell 3000® Index and represents approximately 10% of the total market capitalization of the Russell 3000® Index.

S&P 500® Index is a market-capitalization-weighted index of 500 widely held common stocks.

Fund at a Glance (unaudited)

Investment Breakdown*

September 30, 2020

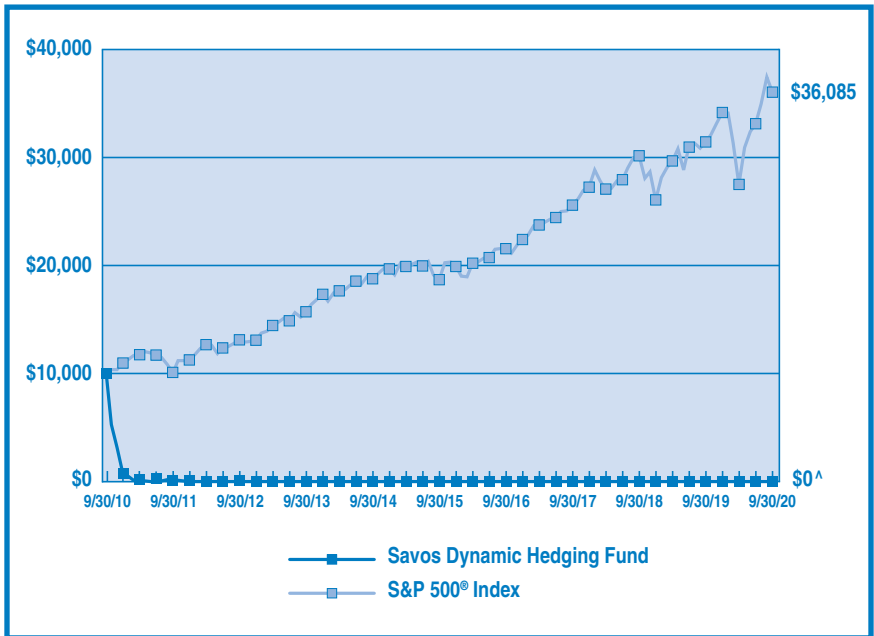

* As a percentage of total investments. Percentages expressed exclude derivative instruments, such as futures. Please note that Fund holdings are subject to change.

Fund Performance (unaudited)

Comparison of the Change in Value of a \$10,000 investment in the Savos Dynamic Hedging Fund vs. S&P 500® Index

Average Annual Total Returns* September 30, 2020

	1 Year	5 Years	10 Years
Savos Dynamic Hedging Fund**	-6.80%	4.43%	-95.10%
S&P 500® Index	15.15%	14.15%	13.74%

In July 2015, the Fund changed its investment strategy from hedge-focused (experiencing substantial losses in the absence of severe and sustained market declines) to dynamic (switching between market exposure and hedge exposure). The current strategy is designed to provide market-like exposure during normal markets and hedge-like exposure during severe and sustained market downturns. The Fund is not a complete investment program and is intended to be used as a component of a broader investment allocations. This Fund performance does not represent the performance of clients' total portfolios.

* Returns shown above do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares. Performance shown represents past performance. Performance results above include the Fund's performance using the prior strategy. Past performance is no guarantee of future results and current performance may be higher or lower than the performance shown above.

** Returns reflect fee waivers and/or expense reimbursements.

^ Amount is less than \$1.00.

Fund Expenses (unaudited)

Example

As a shareholder of the Fund, you incur ongoing costs, including management fees and other Fund expenses. This example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The example is based on an investment of \$1,000 invested on April 1, 2020, and held for the six months ended September 30, 2020.

Actual Expenses

The table below titled “Based on Actual Total Return” provides information about actual account values and actual expenses. You may use the information provided in this table, together with the amount you invested, to estimate the expenses that you paid over the period. To estimate the expenses you paid on your account, divide your ending account value by \$1,000 (for example, an \$8,600 ending account value divided by \$1,000 = 8.6), then multiply the result by the number under the heading entitled “Expenses Paid During the Period”.

Based on Actual Total Return ⁽¹⁾

	Beginning Account Value	Ending Account Value	Annualized Expense Ratio ⁽²⁾	Expenses Paid During the Period ⁽²⁾
Savos Dynamic Hedging Fund	\$1,000.00	\$954.10	1.50%	\$7.33

(1) For the six months ended September 30, 2020.

(2) Expenses (net of waiver) are equal to the Fund's annualized expense ratio multiplied by the average account value over the period, multiplied by 183/366 to reflect the one-half year period.

Fund Expenses (unaudited) (continued)

Hypothetical Example for Comparison Purposes

The table below titled “Based on Hypothetical Total Return” provides information about hypothetical account values and hypothetical expenses based on the actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund’s actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use the information provided in this table to compare the ongoing costs of investing in the Fund and other funds. To do so, compare the 5% hypothetical example relating to the Fund with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table below are meant to highlight your ongoing costs only and do not reflect any transactional costs. Therefore, the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transaction costs were included, your costs would have been higher.

Based on Hypothetical Total Return ⁽¹⁾

	Beginning Account Value	Ending Account Value	Annualized Expense Ratio ⁽²⁾	Expenses Paid During the Period ⁽²⁾
Savos Dynamic Hedging Fund	\$1,000.00	\$1,017.55	1.50%	\$7.57

(1) For the six months ended September 30, 2020.

(2) Expenses (net of waiver) are equal to the Fund’s annualized expense ratio multiplied by the average account value over the period, multiplied by 183/366 to reflect the one-half year period.

See Notes to Financial Statements.

1. Organization and Significant Accounting Policies

The Savos Dynamic Hedging Fund (the “Fund”), a separate series of the Savos Investments Trust (the “Trust”), a Delaware statutory trust, is registered under the Investment Company Act of 1940, as amended, (the “1940 Act”) as a diversified, open-end management investment company.

The Fund seeks to partially offset extreme declines in the equity markets while also seeking to provide positive total returns in rising markets. The Fund is intended for use by asset managers, including AssetMark, Inc., the investment advisor of the Fund, (“AssetMark” or the “Advisor”), to provide some measure of downside protection in the event that client assets, which are sensitive to movements in the equity markets, are exposed to significant loss of value as a result of a severe and sustained decline in the broad-based equity market. During periods of rising equity markets, the Fund seeks to participate in a portion of that market rise, net of the cost of any risk management protection.

The Fund is an investment company and follows accounting and reporting guidance under Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) Topic 946, *Financial Services — Investment Companies*. The following is a summary of the significant accounting policies consistently followed by the Fund which are in conformity with U.S. generally accepted accounting principles (“GAAP”). The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and reported amounts of income and expenses during the period. Actual results could differ from those estimates.

(a) Investment Valuation. Portfolio securities listed on a national or foreign securities exchange, except those listed on NASDAQ, for which market quotations are available are valued at the last quoted sale price on each business day. Portfolio securities traded on NASDAQ are valued at the NASDAQ Official Closing Price (“NOCP”) on each business day. If there is no reported sale on an exchange or NASDAQ, the portfolio security will be valued at the mean between the most recent quoted bid and asked price. Price information on listed securities is taken from the exchange where the security is primarily traded.

All equity securities that are not traded on a listed exchange are valued at the last sale price in the over-the-counter market. If a non-exchange traded security does not trade on a particular day, then the mean between the last quoted closing bid and asked price will be used. Non-exchange traded American Depositary Receipts (“ADRs”) are priced with an evaluated price as determined by the current evaluated pricing procedures of, and provided by, the pricing vendor.

Fixed income securities that have a maturity of greater than 60 days are generally valued on the basis of evaluations obtained from third party pricing services, which take into account appropriate factors such as institutional-sized trading in similar groups of securities, yield, quality, coupon rate, maturity, type of issue, trading characteristics and other market data. Short term investments having a maturity of less than 60 days are generally valued at amortized cost, which approximates fair value.

Investments in mutual funds, including money market funds, are valued at the closing net asset value per share of each mutual fund on the day of valuation.

Futures contracts are valued at the daily quoted settlement prices.

To assess the continuing appropriateness of security valuation, the Advisor regularly compares prior day prices with current day prices and transaction prices. When the comparison results exceed pre-defined thresholds, the Advisor challenges the prices exceeding tolerance levels with the pricing service or broker. Securities for which no market quotations are readily available or when a significant event has occurred between the time of the securities’ last close and the time that the Fund next calculates its net asset value will be valued at their fair value as determined by the Fund’s Valuation Committee under procedures adopted by the Board of Trustees (the “Board”).

Valuation Measurements

The Trust has adopted authoritative fair valuation accounting standards, which establish an authoritative definition of fair value and set out a hierarchy for measuring fair value. These standards require disclosures about the various inputs and valuation techniques used to develop the measurements of fair value and a discussion of changes in valuation techniques and related inputs, if any, during the period. In addition, these standards require expanded disclosure for each major category of assets. These inputs are summarized in the three broad levels listed below:

Notes to Financial Statements (continued)

- Level 1 — Quoted prices in active markets for identical securities that the Fund has the ability to access.
- Level 2 — Other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.).
- Level 3 — Significant unobservable inputs (including the Fund’s own assumptions in determining the fair value of investments).

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The following is a summary of the inputs used to value the Fund’s net assets as of September 30, 2020:

	Level 1	Level 2	Level 3	Total
U.S. Treasury Obligations	\$ —	\$39,588,913	\$—	\$39,588,913
Short Term Investments	27,916,336	—	—	27,916,336
Total Investments	\$27,916,336	\$39,588,913	\$—	\$67,505,249
Other Financial Instruments*				
Futures	\$ (306,703)	\$ —	\$—	\$ (306,703)

* Other Financial Instruments are derivative instruments not reflected in the Schedule of Investments, such as futures. Futures are reflected at the unrealized appreciation (depreciation) on the instrument as reported on the Schedule of Open Futures Contracts.

For further information regarding security characteristics, see the Schedule of Investments.

(b) Subsequent Events Evaluation. In preparing these financial statements, the Fund has evaluated events and transactions through the date of issuance for potential recognition or disclosure resulting from subsequent events. This evaluation did not result in any subsequent events that necessitated disclosures and/or adjustments to the financial statements.

(c) COVID-19 Pandemic. The recent global outbreak of COVID-19 has disrupted economic markets and the prolonged economic impact is uncertain. The operational and financial performance of the issuers of securities in which the Fund invests depends on future developments, including the duration and spread of the outbreak, and such uncertainty may in turn impact the value of the Fund’s investments.

(d) Repurchase Agreements. The Fund may enter into repurchase agreements with banks and securities dealers. These transactions involve the purchase of securities with a simultaneous commitment to sell the securities to the bank or the dealer at an agreed-upon date and price. A repurchase agreement is accounted for as an investment by the Fund, collateralized by securities, which are delivered to the Fund's Custodian or to an agent bank under a tri-party agreement. The securities are marked-to-market daily and additional securities are received as collateral, to ensure that their value equals or exceeds the repurchase price plus accrued interest.

(e) Option Contracts. The Fund may purchase or write (sell) call and/or put options. In the case of options on equities, a call (put) option is a contract that gives the purchaser of the option, in return for a premium, the right to purchase (sell), and the writer of the option the obligation to sell (purchase), upon expiration of the option, the underlying security at the specified exercise price. Prior to expiration, the value of a call (put) option generally increases (decreases) as the price of the underlying security increases (decreases). Exchange-traded options are valued at the last reported sale price on the exchange on which the security underlying the option is principally traded. If no sales are reported on a particular day for exchange-traded options, or the options are not exchange-traded, the options are valued at the mean between the most recent quoted bid and asked quotations at the close of the exchange.

The premium that a Fund pays when purchasing a call option or receives when writing a call option will reflect, among other things, the fair value of the security, the relationship of the exercise price to the fair value of the security, the relationship of the exercise price to the volatility of the security, the length of the option period and supply and demand factors. The premium is the fair value of an option at the date of purchase.

A purchaser (holder) of a put option pays a non-refundable premium to the seller (writer) of a put option to obtain the right to sell a specified amount of a security at a fixed price (the exercise price) during a specified period (exercise period). Conversely, the seller (writer) of a put option, upon payment by the holder of the premium, has the obligation to buy the security from the holder of the put option at the exercise price during the exercise period.

(f) Futures Contracts. The Fund may purchase and sell futures contracts, including those based on particular securities, securities indices, interest rates, debt obligations, foreign currencies and other financial instruments and indices. A futures contract is a standard binding agreement to buy or sell a specified quantity of an underlying reference asset, such as a specific security or index of securities, at a specified price at a specified later date. A “sale” of a futures contract means the acquisition of a contractual obligation to deliver the underlying asset called for by the contract at a specified price on a specified date. A “purchase” of a futures contract means the acquisition of a contractual obligation to acquire a specified quantity of the underlying asset called for by the contract at a specified price on a specified date. The purchase or sale of a futures contract will allow the Fund to increase or decrease its exposure to the underlying asset, such as a security or index of securities. In most cases the contractual obligation under a futures contract may be offset, or “closed out,” before the settlement date so that the parties do not have to make or take delivery of the reference asset.

(g) Swaps. The Fund may enter into swaps for purposes of reducing or obtaining short market exposure or to help offset the costs of purchasing hedging investments and to generate additional income. Generally, swap agreements are contracts between the Fund and another party (the swap counterparty) involving the exchange of payments on specified terms over periods ranging from a few days to multiple years. In a basic swap transaction, the Fund agrees with the swap counterparty to exchange the returns (or differentials in rates of return) and/or cash flows earned or realized on a particular “notional amount” or value of predetermined underlying reference instruments. The notional amount is the set dollar or other value selected by the parties to use as the basis on which to calculate the obligations that the parties to a swap agreement have agreed to exchange.

Derivative Instruments and Hedging Activities

During normal market conditions, the Fund invests primarily in equity securities that broadly represent the U.S. Equity Market (including common stocks of companies of any size capitalization and exchange-traded funds (“ETFs”) related to equity investments); derivative instruments related to the U.S. Equity Market (futures contracts, options and swaps on individual equity securities

(including ETFs) and U.S. equity indexes and equity-related indexes such as the Cboe Volatility Index (the “VIX Index”); and fixed-income securities (including money market funds, U.S. Government securities (such as U.S. Treasury obligations) and other short-term or variable-rate, high quality securities and related ETFs). The Fund will invest in fixed-income securities that are investment grade (i.e., rated within one of the four highest rating categories by a Nationally Recognized Statistical Rating Organization (“NRSRO”) or determined to be of comparable quality by AssetMark if the security is unrated). In selecting equity securities, AssetMark will use a quantitative process to evaluate securities based on their characteristics, such as valuation and dividend yield. The fixed-income securities in which the Fund invests may have maturities of any length. AssetMark will use one or more quantitative, rules-based methodologies to determine when to alter the Fund’s exposure to the U.S. Equity Market. These methodologies use statistical analysis of indicators related to securities or indices and the price of derivatives related to securities or indices. The methodologies will not rely primarily on fundamental valuation ratios such as price-to-earnings. AssetMark has created standardized gauges that can be compared over time and against each other. The gauges will seek to measure: (i) the potential for near-term market volatility; (ii) the likelihood a drawdown in one part of the market will affect other parts of the market; and (iii) the possibility of significant drawdown and market volatility. When AssetMark’s quantitative models indicate the increased likelihood of a significant downturn in the U.S. Equity Market, the Fund will reduce its exposure to the U.S. Equity Market and/or invest in instruments that provide short exposure to the U.S. Equity Market. The Fund will obtain short exposure to the U.S. Equity Market through the use of derivative instruments such as futures contracts, options and/or swaps or through the purchase of ETFs that it believes may effectively hedge equity investments. In addition to using derivatives for purposes of reducing or obtaining short market exposure, the Fund may also use derivatives to help offset the costs of purchasing hedging investments and to generate additional income.

Risk of Derivatives. A derivative is an instrument with a value based on the performance of an underlying currency, security, index or other reference asset. The use of derivatives may involve risks different from, or greater than, the risks associated with investing in more traditional investments, such as stocks and

bonds. Derivatives can be complex and may perform in ways unanticipated by the Fund. The Fund's use of derivatives involves additional risks and transaction costs such as (i) the risk of adverse changes in the value of these instruments, (ii) the risk of imperfect correlation between the price of derivatives and movements in the price of the underlying securities or index, (iii) the fact that use of derivatives requires different skills than those needed to select portfolio securities, (iv) the risk of the possible absence of a liquid secondary market for a particular derivative at any moment in time, and (v) the risk of loss of assets posted by the Fund as collateral or margin in connection with its transactions in derivatives. The derivatives in which the Fund invests are subject to loss of value over time, and may have no value at the time of their expiration.

Derivatives involve costs and may create leverage insofar as the Fund may receive returns (or suffer losses) in an amount that significantly exceeds the amount that the Fund committed as initial margin. The use of derivatives can result in losses or gains to the Fund that exceed the amount the Fund would have experienced in the absence of using derivatives. A relatively small price movement in a derivative may result in an immediate and substantial loss, or gain, to the Fund. Certain derivatives have the potential for unlimited loss, regardless of the size of the initial investment. The use of leverage may cause the Fund to liquidate portfolio positions to satisfy its obligations or to meet asset segregation requirements when it may not be advantageous to do so.

The use of derivatives could also result in a loss if the counterparty to a transaction does not perform as promised, including because of such counterparty's bankruptcy or insolvency. This risk may be heightened during volatile market conditions. An exchange or market may issue trading halts on specific securities or derivatives, or may close early or late. If trading is halted, then the Fund may not be able to purchase or sell those securities or derivatives and may also be required to use a "fair value" method to price its outstanding securities or derivatives. At times, the Fund may be constrained in its ability to use derivatives by an unanticipated inability to close positions when it would be most advantageous to do so.

During the year, the Fund held futures contracts to attempt to effectively hedge equity investments or to generate additional income. The Fund entered into swap agreements for purposes of reducing or obtaining short market exposure or

Notes to Financial Statements (continued)

to help offset the costs of purchasing hedging investments and to generate additional income. Derivatives are not accounted for as hedging instruments.

Statement of Assets and Liabilities - Values of Derivative Instruments as of September 30, 2020:

	Asset Derivatives		Liability Derivatives	
	Statement of Assets and Liabilities Location	Value	Statement of Assets and Liabilities Location	Value
Equity Contracts - Futures*	Unrealized appreciation on Futures**	\$—	Unrealized depreciation on Futures**	\$(306,703)
Total		\$—		\$(306,703)

* Includes cumulative appreciation/depreciation as reported on the Schedule of Open Futures Contracts.

** Included in total accumulated deficit on the Statement of Assets and Liabilities.

The Effect of Derivative Instruments on the Statement of Operations for the year ended September 30, 2020:

Amount of Realized Gain (Loss) on Derivatives Recognized in Income

	Futures	Swaps
Equity Contracts	\$(5,448,225)	\$ 779,245

Change in Unrealized Appreciation (Depreciation) on Derivatives Recognized in Income

	Futures	Swaps
Equity Contracts	\$295,800	\$(137,701)

The average monthly notional amount outstanding of futures and swaps during the year ended September 30, 2020 were as follows:

Long Positions	Savos Dynamic Hedging Fund
Futures	\$63,805,026
Swaps	\$ 5,295,039
Short Positions	Savos Dynamic Hedging Fund
Futures	\$(5,811,475)

Notes to Financial Statements (continued)

Offsetting Assets and Liabilities

The table below, as of September 30, 2020, discloses both gross and net information about instruments and transactions eligible for offset in the Statement of Assets and Liabilities, and instruments and transactions that are subject to an agreement similar to a master netting agreement (“Master Agreements”) as well as amounts related to collateral held at clearing brokers and counterparties. For financial reporting purposes, the Fund does not offset derivative assets and liabilities, and any related collateral received or pledged, on the Statement of Assets and Liabilities, except in the case of futures contracts.

The Fund is a party to International Swaps and Derivatives Association (“ISDA”) Master Agreements with certain counterparties that govern the over-the-counter derivative contracts entered into by the Fund. The Master Agreements may contain provisions regarding, among other things, the parties’ general obligations, representations, agreements, collateral requirements, events of default and early termination. Termination events applicable to the Fund may occur upon a decline in the Fund’s net assets below a specified threshold over a certain period of time.

	Gross Amounts not offset in the Statement of Assets and Liabilities					
	Gross Amounts in the Statement Assets and Liabilities	Gross Amounts Offset in the Statement of Assets and Liabilities	Net Amounts Presented in the Statement of Assets and Liabilities	Financial Instruments	Collateral Received/ Pledged	Net Amount
Assets:						
Futures —						
R.J. O'Brien	\$268,095	\$—	\$268,095	\$—	\$—	\$268,095
	\$268,095	\$—	\$268,095	\$—	\$—	\$268,095

In some instances, the collateral amounts disclosed in the table (if applicable) were adjusted due to the requirement to limit the collateral amounts to avoid the effect of overcollateralization. Actual collateral received/pledged may be more than the amounts disclosed herein.

(h) Investment Transactions and Dividend Income. Investment transactions are accounted for on trade date. Dividend income is recorded on the ex-dividend date. Interest income, adjusted for amortization of premium and accretion of discount, using the effective yield method, is recorded on an accrual basis. Gains or losses on the sale of investments are calculated by using the specific identification method.

(i) Dividends and Distributions to Shareholders. Dividends and distributions to shareholders are recorded on the ex-dividend date; the Fund distributes dividends and capital gains, if any, at least annually. The character of income and gains to be distributed is determined in accordance with income tax regulations, which may differ from GAAP.

(j) Federal Income Taxes. It is the Fund's policy to comply with the Federal income and excise tax requirements of the Internal Revenue Code of 1986, as amended, applicable to regulated investment companies. Accordingly, the Fund intends to distribute substantially all of its taxable income and net realized gains on investments, if any, to shareholders each year. Therefore, no Federal income tax provision is required. Under the applicable foreign tax law, a withholding tax may be imposed on interest, dividends and capital gains at various rates. Net Investment Income and realized gains and losses for Federal income tax purposes may differ from that reported on the financial statements because of permanent book-to-tax differences. GAAP requires that permanent differences between financial reporting and tax reporting be reclassified between various components of net assets. These reclassifications have no effect on net assets or net asset value per share. There were no such reclassifications made for the year ended September 30, 2020.

2. Management Agreement, Administration Agreement, and Other Transactions

AssetMark is the Fund's investment manager. The Fund pays AssetMark a management fee calculated at an annual rate of 1.20% of the Fund's average daily net assets. This fee is calculated daily and paid monthly. AssetMark also provides certain administrative services to the Fund, pursuant to the Administrative Services Agreement between the Trust and AssetMark, for which AssetMark receives a fee of 0.25% of the average daily net assets of the

Notes to Financial Statements (continued)

Fund. The administrative services may include development and maintenance of a web-based software platform for both investment advisors and shareholders; creation of a customized full-color client quarterly performance review for each individual client; facilitating the initiation and setup of new accounts and related asset transfers; creation of quarterly performance reports for use by advisors and their clients reflecting a consolidated view of all Fund holdings beneficially owned by the client among various account registration types; attending to shareholder correspondence, requests and inquiries, and other communications with shareholders and their representatives; monitoring and overseeing non-advisory relationships with entities providing services to the Fund, including the transfer agent and custodian; and facilitating the calculation and automated payment of fees by multiple client account registrations in a consolidated fashion to the client's advisor. AssetMark has agreed to waive its management fee and/or reimburse the Fund's other expenses to the extent necessary to ensure that the Fund's operating expenses (excluding any taxes, interest, brokerage fees, securities lending expense offset amounts, acquired fund fees and expenses, and non-routine expenses) do not exceed 1.50% of average daily net assets through January 31, 2021. During the year ended September 30, 2020, AssetMark reimbursed \$175,055 of management fees and other expenses to the Fund, pursuant to the Fund's expense limitation agreement. After taking these waivers and expense reimbursements into account, the Fund's annual operating expenses were 1.50% of average daily net assets. Any such waiver or reimbursement is subject to later adjustment to allow AssetMark to recoup amounts waived or reimbursed to the extent such reimbursement can be made without causing the Fund's annualized expense ratio to exceed 1.50%, provided, however, that AssetMark shall only be entitled to recoup such amounts for a period of three years after the end of the calendar month in which the fees were waived or expenses paid. Waived expenses subject to potential recovery are as follows:

Year of Expiration	09/30/2023	09/30/2022	09/30/2021
Amount	\$175,055	\$245,403	\$216,771

U.S. Bancorp Fund Services, LLC, doing business as U.S. Bank Global Fund Services ("Fund Services"), and U.S. Bank, N.A. ("USB"), an affiliate of Fund Services, provide administrative, accounting, transfer agency, shareholder

servicing, dividend disbursing services and custody services to the Fund. For these services, besides custody, Fund Services receives an annual fee, paid monthly, from the Fund. USB receives an annual fee, paid monthly, from the Fund for the custody services provided. Fees earned by Fund Services and USB for the year ended September 30, 2020 can be found under the captions “Administration, accounting, and shareholder servicing fees” and “Custody fees” in the Statement of Operations, respectively.

AssetMark BrokerageTM, LLC (“Distributor”), an affiliate of the Advisor, serves as the Fund’s distributor and principal underwriter. The Fund did not pay any commissions or other compensation to the Distributor during the year ended September 30, 2020.

The Fund pays a portion of the salary of the Trust’s Chief Compliance Officer (“CCO”), as approved by the Board of Trustees.

The Trust has established a line of credit (“LoC”) with USB to be used for temporary or emergency purposes (subject to certain restrictions and covenants), primarily for financing redemption payments, using the securities in the Fund’s portfolio as collateral. GPS Funds I and GPS Funds II, which are also managed by AssetMark, are also parties to the same LoC agreement. The LoC will mature, unless renewed, on July 31, 2021. Borrowing under the LoC is limited to the lesser of 20% of the total market value of a Fund, 20% of specific marketable securities acceptable to USB, or \$250,000,000 for all Funds. The interest rate paid by the Fund on outstanding borrowings is equal to the prime rate, which was 3.25% at September 30, 2020. During the year ended September 30, 2020, the Fund did not borrow on the LoC. The Fund has authorized USB to charge any of the custody accounts of the Fund for any missed payments by the Fund.

3. Capital Shares

The Trust’s Declaration of Trust authorizes the Board to issue shares without limitation as to numbers and without par value.

Notes to Financial Statements (continued)

Transactions in shares of the Fund were as follows:

	Year Ended September 30, 2020	Year Ended September 30, 2019
Beginning Shares	6,952,642	7,746,685
Shares sold	1,890,755	938,808
Shares Reinvested	23,231	17,367
Shares redeemed	(2,520,747)	(1,750,218)
Ending Shares	6,345,881	6,952,642

4. Investment Transactions

The aggregate purchases and sales of securities, excluding short-term investments, for the year ended September 30, 2020, are summarized below.

Savos Dynamic Hedging Fund	Purchases	Sales
U.S. Government Securities	\$19,737,518	\$12,400,000

5. Federal Income Tax Information & Distributions to Shareholders

The tax characterization of distributions for the Fund for the fiscal years ended September 30, 2020 and September 30, 2019 were as follows:

	Year Ended September 30, 2020	Year Ended September 30, 2019
Distributions paid from:		
Ordinary income	\$256,765	\$218,950
Long-term capital gain	—	—
Total distributions paid	\$256,765	\$218,950

The following information is computed on a tax basis as of September 30, 2020:

	Investments
Federal tax cost of securities	\$66,698,149
Gross unrealized appreciation	\$ 807,100
Gross unrealized depreciation	—

Notes to Financial Statements (continued)

	Investments
Net unrealized appreciation	\$ 807,100
Undistributed ordinary income	—
Post-October capital loss	—
Late year ordinary loss*	(245,201)
Other accumulated loss	(84,757,404)
Total accumulated deficit	\$(84,195,505)

* The qualified late year ordinary loss is the excess of the sum of the specified losses attributable to the portion of the taxable year after October 31, and the ordinary losses attributable to the portion of the taxable year after December 31, over the sum of the specified gains attributable to the portion of the taxable year after October 31, and other ordinary income attributable to the portion of the taxable year after December 31.

As of September 30, 2020, the Fund had the following capital loss carryforwards for federal income tax purposes:

	Amount	Expires
Short Term Capital Loss Carryforwards	\$31,218,224	Indefinite
Long Term Capital Loss Carryforwards	53,539,180	Indefinite

To the extent the Fund realizes future net capital gains, taxable distributions to its shareholders will be offset by any unused capital loss carryforwards. Utilization of the carryforwards will happen only if there are gains in the future.

The Trust has adopted financial reporting rules regarding recognition and measurement of tax positions taken or expected to be taken on a tax return. The Trust has reviewed all open tax years and major jurisdictions and concluded that there is no impact on the Trust's net assets and no tax liability resulting from unrecognized tax benefits relating to uncertain income tax positions taken or expected to be taken on a tax return. The Trust recognizes interest and penalties, if any, related to unrecognized tax benefits as income tax expense on the Statement of Operations.

6. Commitments and Contingencies

In the normal course of business, the Fund enters into contracts that contain a variety of representations and warranties and which provide general indemnifications. The Fund's maximum exposure under these arrangements is

Notes to Financial Statements (continued)

unknown, as this would involve future claims that may be made against the Fund that have not yet occurred. However, based on experience, the Fund expects the risk of loss to be remote.

To the Shareholders and Board of Trustees of
Savos Investments Trust

Opinion on the Financial Statements

We have audited the accompanying statement of assets and liabilities, including the schedules of investments and open futures contracts, of Savos Investments Trust comprising Savos Dynamic Hedging Fund (the “Fund”) as of September 30, 2020, the related statement of operations for the year then ended, the statements of changes in net assets for each of the two years in the period then ended, including the related notes, and the financial highlights for each of the five years in the period then ended (collectively referred to as the “financial statements”). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Fund as of September 30, 2020, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period then ended, and the financial highlights for each of the five years in the period then ended, in conformity with accounting principles generally accepted in the United States of America.

Basis for Opinion

These financial statements are the responsibility of the Fund’s management. Our responsibility is to express an opinion on the Fund’s financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (“PCAOB”) and are required to be independent with respect to the Fund in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement whether due to error or fraud.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in

the financial statements. Our procedures included confirmation of securities owned as of September 30, 2020, by correspondence with the custodian and brokers. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

We have served as the Fund's auditor since 2015. We have served as the auditor of one or more investment companies advised by AssetMark, Inc. since 2014.
